Aims and Objectives

Occupation summary

This standard covers a wide range of roles including internal facing 'operational management' and externally focussed 'client management'. All roles will require very strong technical competence, with the ability to apply this to a variety of scenarios depending on the size, specialism and business model of the company. The following are examples of different functional areas typically found within Insurance companies:

Broking; Client Management; Underwriting; Claims; Operations; Loss Adjusting; Reinsurance; Risk Management; Insurance Product and Pricing; Complaint Handling.

As part of the EPA, learners will be tested on the Key Skills and Behaviours in conjunction with the criteria in the Assessment Plan for the standard.
